

Blackboard alphabets and macro expansion

Roman versus blackboard: $R \neq \mathbb{Q}$, $Z \neq \mathbb{Z}$, $Q \neq \mathbb{Q}$, $N \neq \mathbb{N}$.

$$\mathbb{N} \subseteq \mathbb{Z} \subseteq \mathbb{Q} \subseteq \mathbb{Q}, \qquad x \in \mathbb{Q} \setminus \mathbb{Q}, \qquad a, b \in \mathbb{Z}_{>0}.$$

ABCDEFGHIJKLMNOPQRSTUVWXYZ

$$\mathbb{Q}^{\mathbb{Z}_{>0}} \qquad \frac{\mathbb{Q}_{>0}}{\mathbb{Z}_{>0}} \qquad \mathbb{N} \subseteq \mathbb{Z} \qquad \mathbb{Q} \subseteq \mathbb{Q}$$
