

$$\begin{aligned}(a+b)^2 &= a^2 + 2ab + b^2 \\ &= a(a+2b) + b^2\end{aligned}\tag{1}$$

$$a = b + c\tag{2}$$

$$d = e + f\tag{3}$$

$$\begin{aligned}a + b + c + d + e + f + g + h + i + j + k + l \\ = m + n + o + p + q + r + s + t + u + v + w + x\end{aligned}\tag{4}$$

$$\begin{array}{ll}a = b & x + y = 1 \\ c = d & x - y = 0\end{array}$$

$$x = y$$

The relation persists under translation.

$$x + 1 = y + 1$$
